CYBER SECURITY AWARENESS

STOP • THINK • VERIFY • PROTECT

Simple habits can prevent phishing, malware, account compromise, and data exposure.

01
NEVER SHARE PASSWORDS

Keep passwords private.
Never share passwords or authentication codes with unexpected callers or messages.

02
THINK BEFORE CLICKING

Treat unexpected links, messages, and login requests with caution.
Verify before taking action.

03
USE STRONG PASSWORDS

Use long, unique passwords or passphrases. Avoid reusing the same password across accounts.

04
ENABLE 2FA / MFA

Add another verification factor to important accounts whenever multi-factor authentication is available.

05
KEEP DEVICES UPDATED

Install security updates for operating systems, applications, and supported security software.

06
AVOID UNKNOWN FILES

Do not open unexpected attachments or install software from suspicious or unknown sources.

WHEN IN DOUBT: STOP – VERIFY – REPORT

Use a trusted website, official application, or independently verified contact method before taking action.

Security Awareness Activity — Think before you click, verify unexpected requests, and report suspicious activity.
